SKILLS

Flutter   BLoC   React   Tailwind CSS

React Native   Redux   JavaScript   ExpressJS

NodeJS   Firebase   MongoDB   AWS Services

Git   Orcale SQL   Scrum   Socket IO   HTML

CSS

PROJECTS

Stylish (03/2022 - 04/2022) ⬈
- A e-commerce mobile application with easy to use and user friendly interface.
- Built using Flutter and BLoC.
- Used cubits primarily to store the state of the application.
- Responsive UI, screens look identical regardless of the device's dimensions.

Space (05/2021 - Present) ⬈
- A mobile and web application that lets users chat, video call, plan/schedule meetings and save their documents in the cloud..
- Built using Flutter, React, Electron, NodeJS and MongoDB.
- Used Provider to handle state management in Flutter and Redux in React.
- Integrated Socket IO to allow users to text each other in real time.
- Used AWS S3 to store user documents in cloud,
- Used CI/CD to automatically create IOS/Android builds.

Social Media App (10/2020 - 12/2020) ⬈
- A social media web app that lets users post messages, like and comment on other posts.
- Built using React, Redux, ExpressJS, Axios and Firebase.
- Used React to build the user interface and UI components.
- Used Redux to create a global store that holds the application state and to manage state for the web app.
- Used ExpressJS to create a RESTful API to access and use data from the Firebase database and Axios to make HTTP Requests from the client to the RESTful API created by server to fetch data.
- Used Firebase as a database to store data.
